

WASHOUT BOOTHS

CLEAN AND RECLAIM

WDX

A washout booth is the foundation of an efficient clean room, and the WDX is Blackline's top-of-the-line washout. Constructed of easy-to-clean, welded polypropylene, the WDX series (WDX36 shown) is precision-built and features built-in screen supports, scrubber hooks and a full ceiling and splash guards to help minimize overspray.

The WDX comes standard with a fully backlit, semi-transparent polypro back panel that makes viewing screens easy, and the perforated drain prevents tape from clogging the waste system.

Sizes:

Height (with legs): 74"
