CHEMCON ADHESIVE HARDENER

Instant Adhesive Hardener

GENERAL DESCRIPTION

ChemCon Adhesive Hardener is formulated to cure and bond cyanoacrylate adhesives instantly. It is ideal for bonding fabric (mesh) to wood or aluminum frames. The use of ChemCon Adhesive Hardener dramatically speeds up the re-stretch process. Allowing the frame to be "cut-out" immediately.

*** Available in both Aerosol and Liquid form.**

ADVANTAGES

- Easy to use
- Economical
- Instantly cures cyanoacrylate adhesive
- Speeds up re-stretch process
- No mixing required
- Long shelf life

Quick Tip:

Apply an even layer of hardener, 6-8 inches away, directly over the adhesive. Excessive spray can weaken the adhesive bond.

Step 1.

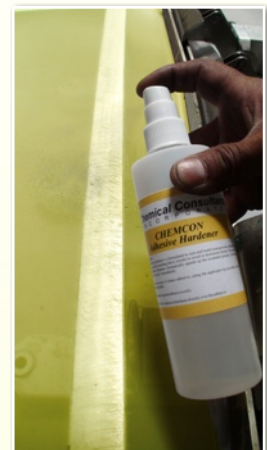

Step 2.

Step 3. Aerosol

Step 3. Liquid

Step 1. Apply an even layer of instant adhesive, using the applicator tip provided, to the surface to be bonded.

Step 2. Use a scraper to spread adhesive evenly.

Step 3. Apply ChemCon Adhesive Hardener, aerosol or liquid, directly over the adhesive.

Packaging

Aerosols 1 can
 12 x1 can case
