POSITIVE FILM FOR INKJET PRINTER

Silkjet SC4/UC5

Kimoto gives silkscreen printers two media choices for Computer-To-Film applications. Choose Silkjet SC4 or UC5 inkjet printable media to make film positives to burn screens without the need for cameras or processors. Save time and money, simply output to Silkjet using only Epson Printers with Dye-base Inks or UltraChrome Inks then expose your screen. It is that easy! The inherent and dimensional stability of SC4 and UC5 media are well-suited for multi-color printing.
